Notification of Required Access to Buildings Attics:

IMPORTANT NOTICE AND INFORMATION TO ALL UNIT OWNERS AND RESIDENTS

In conjunction and coordination with the Association's insurance provider and at their request, the Association will be performing inspections of the electrical systems in the attic spaces of each of the buildings comprising the Parkfairfax Condominium Unit Owners Association. To that end, we need each unit owner's/resident's assistance in coordinating access to those attic spaces. As you are aware, access to those spaces is generally afforded only through the individual unit. Accordingly, the Association will be reaching out to you as the owner or resident of a unit to procure access to the attic space. Please note that the Association authority to access the unit and the attic space is set forth by statute, Section 55-79.79 of the Virginia Condominium Act and Article V, Section 9 of the Association's Bylaws. We look forward to working together with all of you to insure the successful completion of this important project.

A team consisting of 2 members of the Parkfairfax Condominium Association's Maintenance staff are scheduled to perform a full attic inspection for any noticeable issues and test the Association-installed (Ward 1 only) smoke alarm in your attic. Additionally, Parkfairfax Association will install new 10-year sealed Lithium battery smoke detectors in attics in Wards 2, 3, 4 and 5. "A and B" type buildings will have two (2) detectors installed, one for each side of the brick demising wall installed and "C" type buildings will have three (3) detectors installed, one of each section, left, middle and right. This inspection will occur within 4 weeks following the delivery date of this notice.

Both the inspection and any required repairs to these systems, will be performed at no cost to you (with the exception of unit owner installed lighting). While the team is in your attic, they will make a routine inspection of your roof, electrical wiring, squirrel problems, mold and any structural issues. Simple repairs may be made while they are in the attic. You will be notified of any significant problems that may have been found so that a more thorough repair effort may be arranged at a later date.

Please make sure that the Maintenance Office has a working set of keys to your unit. If needed, and when feasible, the team may make one entry into the building's attic area and then work their way across, from attic to attic. They will have the necessary supplies to loosen the wire partitions and re-secure them when complete.

Attached you will find copies of the Admit Slip and schedule for Wards 2, 4 & 5. Please

refer to the schedule for your actual date of inspection. We plan on starting this phase on Monday, April the 1st. This will allow you several weekend cycles to clear pathways in your attic to facilitate the inspections. Remember to move any items that are on top of any wiring.

This schedule may be affected by inclement weather, particularly if staff is redirected to snow removal operations. If your attic's scheduled inspection is affected by inclement weather, that day's workload will be added to the end of the program (currently beginning of April).

Please note that **ONLY** units with attics in each building receives a notification.

Please review, sign, and return Admit Slip to the main office no later than Friday, March 15th.

Thank you for your cooperation and assistance!
