In addition to maintained landscape areas, Parkfairfax has 22 acres of woodlands left in the naturally occurring state of an oak-hickory forest. Woodlands help to slow down storm water runoff before entering Four Mile Run. Parkfairfax Maintenance yard sits along the lower 2.3 miles of the 9 mile long Four Mile Run, part of the Four Mile Run watershed which empties into the Potomac River Basin and Chesapeake Bay Watershed. The Woodlands Committee is committed to preserving and improving the woodlands. We invite you to join our meetings held on the fourth Thursday of the month.
